

AICTE – ARTIFICIAL INTELLIGENCE INTERNSHIP

Movie Recommendation System

Project Internship Report

Submitted by: Abdul Rahman
Roll No.: 25SCS1003004030
B.Tech (CSE) | AIML
IILM University

Internship Duration: 01 July 2026 – 01 August 2026

STUDENT CREDENTIALS

Abdul Rahman

Enrollment / Roll No.
25SCS1003004030

Program & Semester
B.Tech (CSE)

HOST ORGANIZATION
Codex Technologies

Supported by AICTE National Internship Portal

Candidate & Program Overview

Candidate Details

Student Name: ABDUL RAHMAN

Roll Number: 25SCS1003004030

Degree: B.Tech (CSE)

Academic Batch: 2026–2027

University: IILM University

Internship Profile

Program Name: Artificial Intelligence Internship

Specialization Domain: Artificial Intelligence

Duration: 4 Weeks (01 Jul – 01 Aug 2026)

Certificate ID: E19E86-0116588288923

AICTE Student ID: STU6a906a79314141787849337

Organization Profile: Codec Technologies

Codec Technologies Pvt. Ltd. is a global platform focused on empowering learners and connecting diverse talent with meaningful career opportunities.

-  **Industry Exposure:** Provides internship-based practical learning through project work and training tasks.
-  **Internship Focus:** Artificial Intelligence, project development, and practical implementation.
-  **Program Format:** 1-month internship conducted in hybrid mode across India.

Problem Statement & Industry Context

The Problem

Users often face difficulty discovering movies that match their interests when a catalogue contains thousands of titles.

A recommendation system can reduce this search effort by learning from movie features, ratings, reviews, and user behaviour to suggest relevant titles.

The Solution

Build a movie recommendation system using the TMDB 5000 Movies Dataset, preprocessing the data and extracting meaningful

Movie features

Apply content-based, collaborative, popularity-based, and hybrid recommendation ideas to generate personalized or relevant movie suggestions.

Core Project Objectives

Content-Based Recommendation

Recommend similar movies using genre, cast, crew, description, tags, and metadata.

Collaborative Filtering

Use ratings, reviews, watch history, and similar-user behaviour to identify patterns.

Popularity-Based Baseline

Suggest globally popular or highly rated movies as a baseline for new users.

Hybrid Recommendation

Combine content-based and collaborative ideas to improve relevance and reduce cold-start limitations.

Technologies & Recommendation Toolchain

Programming & Data Language: Python

Dataset: TMDb 5000 Movies
Dataset (Kaggle)

Data Processing

Preprocessing, data-column
analysis, missing-value handling,
and feature preparation

Text Processing

Libraries: Pandas, NumPy, Scikit-
Learn

NLP: NLTK; text cleaning and
feature extraction

Recommendation Engine

Vectorization: TF-IDF / Count
Vectorizer

Similarity: Cosine Similarity;
recommendation ranking and
feedback

Dataset: TMDb 5000 Movies
Dataset (Kaggle)

Movie Recommendation System Architecture

Data Layer: TMDB 5000 Movies Dataset with movie metadata and descriptive features.

Preprocessing: Clean text, select useful columns, and prepare structured movie data.

Feature Engineering: Combine genres, tags, cast, crew, description, and metadata.

Vectorization: Apply TF-IDF / Count Vectorizer and calculate Cosine Similarity.

Recommendation Layer: Generate ranked movie suggestions from similarity and user patterns.

Internship Timeline (Weeks 1 to 4)

Recommendation Workflow

Key Project Work & Demonstrated Skills

- ✓ Dataset & Preprocessing: Explored the TMDb 5000 Movies Dataset, analysed columns, cleaned text, and prepared movie features.
- ✓ Feature Engineering: Combined genre, tags, cast, crew, descriptions, and metadata to create meaningful recommendation features.
- ✓ NLP & Similarity: Used NLTK for text processing and Scikit-Learn vectorization with Cosine Similarity for movie matching.
- ✓ Recommendation Logic: Studied content-based, collaborative, popularity-based, and hybrid approaches for generating relevant suggestions.
- ✓ Practical Outcome: Developed a structured end-to-end workflow from dataset input and preprocessing to recommendation output.

Verification Details

Internship Title	Artificial Intelligence Internship
Organization	Codec Technologies Pvt. Ltd.
Internship Domain	Artificial Intelligence
Duration	01/07/2026 – 01/08/2026
AICTE Student ID	STU6a906a79314141787849337
APAAR ID	765559541488
Certificate / NCS ID	E19E86-0116588288923

INTERNSHIP OFFER LETTER

Dear Abdul Rahman,

We are pleased to offer you a 1 Month Internship as Project Intern at Codec Technologies, a global platform dedicated to empowering learners and connecting diverse talent to create meaningful career opportunities worldwide. Codec Technologies delivers dedicated IT and business consultancy services across 27+ countries, empowering global innovation and strategic growth.

Internship Details:

- Designation : Artificial Intelligence Intern
- Location & Mode: Pan India, Hybrid
- Duration : 01/07/2026 to 01/08/2026
- Reporting to : Assigned Project Head(s)

This program provides an immersive experience, enabling you to gain industry-level knowledge and acquire valuable skills. Exceptional interns may also qualify for a scholarship award based on weekly performance reviews conducted by project supervisor.

If you accept this offer and the terms above, please complete your assigned projects and training tasks on our platform and via email.

Best regards,

Sincerely,
Dr. Anurag Shrivastava,
Codec Technologies India
NCS ID: E19E86-0116588288923
Date Of Issue - 01/07/2026
